

### **Dept. 7 – Food Preservation**

1. All canned food must be in standard quart or pint jars with 2-piece lid with the exception of fish, jams, jellies, preserves, and salsa. Fish, cream style corn, and pimentos must be in pint jars only. Jams, jellies, and preserves and relish and salsa may be in pint or half-pint jars. Standard canning jars have a brand name. Food must be preserved since the previous county fair and can only be entered once.
2. Potatoes and vegetable soup are both low-acid foods and **MUST BE PRESSURE CANNED ACCORDING TO USDA GUIDELINES**. The processing time and method must be attached to all soup mix exhibits. USDA cautions against thickening soup or adding milk, cream, flour, noodles, or other pasta to soups prior to canning because it affects heat penetration.
3. Canned breads or cakes are not allowed.
4. All home canning exhibits must follow USDA recommendations. **Note:** Ball-Kerr Canning book guidelines do not always meet the USDA recommendations. If using a Ball-Kerr recipe, be sure to check the USDA guidelines to be sure. For recommendations and canning timetables, contact your County Extension Office.
5. Due to updated safety reasons none of the following will be accepted: canned squash including summer, winter, zucchini or spaghetti; pureed or mashed pumpkin; pureed or mashed sweet potatoes; pureed or mashed potatoes; and canned soups with added noodles or other pasta, rice, flour, cream, milk or other thickening agents. Jars sealed with paraffin or wax seals will not be accepted.
6. Each jar must be sealed with a two-piece ring and flat. No one piece lids will be allowed. For judging and safety reasons jars must be clear glass with Mason or other standard/recognized name labeled on jar or box with a clean metal lid and ring, vacuum sealed and of acceptable size per recipe instructions – typically quart, pint or smaller. Any decoration on the jar such as fabric should be put on **AFTER** the product is judged.
7. No food coloring allowed unless recipe calls for it. If used, attach recipe to jar.
8. Dried foods should be prepared according to current USDA information. Dried foods need not be sealed and may be handled by the judges to determine stage of doneness. Dried foods should be displayed in appropriate storage containers (glass jars with rust-free lids, heavy-weight plastic food quality bags, vacuum-sealed plastic food bags, etc.)
9. Exhibits must be labeled with the product, date of food preservation, and method of preservation. Method must state whether processed in water bath, pressure canner, or using another method such as dehydration. For labels, contact County Extension Office or download from <http://uaex.edu/health-living/food-safety/preservation/>. Low acid foods should be pressure canned. (Portion in italics to be determined by individual fair board – Extension encourages adoption of labels by all fair boards for judging accuracy).

**Note: Exhibitors should be prepared to tell the superintendents the method and times used in processing exhibits.**
